

Useful IT in most Acute Hospital/Community Care must be based on

R.I.O.S

(Realistic Input/Output Opportunities)

**Electronic “Whiteboard” highlighting currently relevant
EXISTING PROBLEMS and IDENTIFIED RISKS**

Input to electronic record

DATA ENTRY

“100%” for all Individual Patient Care Items

“1 in n” Samples for purely Audit or Managerial Items

Outputs from electronic record

**Action Suggestions
based on Trigger Data**

**Test Suggestions
and Requests**

**Communications
(Letters, Memos, Proformas)**

**Relevant Guidelines
whenever requested**

**Appropriate Patient
Information Leaflets**

**Any Relevant
Clinical Trials**
