

A major initiative to facilitate the standardisation of the wording of more than 800 chronologically-arranged, flow-patterned, perinatal

C. “Logical Priority” Questions and all Allowable Answers

Basis: In shared community/hospital care, all unjustifiable electronic data re-entry diverts staff away from the care of individual women (“[Every Extra keystroke costs](#)”); and unsurprisingly staff complain bitterly of being compelled to spend more and more time entering data into audit and management “black holes” (“[Paralysis by Analysis](#)”)

Instead, the “Logical Priority” initiative prioritises the standardisation of the electronic recording of data, whenever it is cost-effective in any perinatal computer system with “[Four Guaranteed Places](#)”

will provide better quality “Individual Care”

(with reliable data for management & audit still being collected but, to the staff, invisibly)

[Click here to find out more](#), especially if you might help in this international, internet-based, eventually multi-lingual, open-source initiative.
